# LEAK NEWS

## Your Source for Leak Detection & Repair Solutions

We are thrilled to announce the launch of "Leak News," an exciting newsletter brought to you by LeakTronics, your trusted partner in the world of swimming pool and plumbing leak detection and repair solutions. Dive into a world of invaluable information and stay ahead of the curve with our cutting-edge insights, new product features, demonstration videos, industry updates, tradeshow schedule, customer highlights and so much more.

### LeakTronics News

#### Contractor Highlight

Lou Tobia Jr. established Gator Leak Detection back in 2016 in Lake Worth, FL to provide the highest standard of leak detection and repair service. Lou uses our LeakTronics [equipment](#) and has completed the [swimming pool inspection with leak detection training course](#). Check out [gatorleakdetection.com](#) to learn more about building a successful business.

#### Upcoming Tradeshow and Presentation

See you next week at the [International Pool Spa Patio](#) show at the Las Vegas Convention Center! We are at booth #6355! Darren Merlob will be presenting [Leak Detection & Non-Destructive Pipe Repair Methods](#) on Monday, November 13, 2023, from 8:00 to 9:00 AM at the West Hall, Room W223.

Don't want to go into the pool? The HydroDome can keep you out!

Buy Now!

The **HydroDome** is designed to attach to a standard pool pole to isolate a light, the main drain, side suction, return, etc. When held against an isolated area, the user will hear the sound of water entering through the microphone chamber identifying that there is a leak at the isolated area. It's that easy.

In the case of dual main drains, the weighted dome will seal off the extra drain to determine whether the drains or trunklines are leaking. The HydroDome is ergonomically designed for a single user to listen without bending or kneeling. The neoprene gas-injected gasket will allow for rough or uneven surfaces.
