

DELUXE PIPE CAMERA SYSTEM

READ THIS OPERATIONS MANUAL COMPLETELY BEFORE USE

INTRODUCTION:

The Deluxe Pipe Camera system offers a powerful swet of tools to locate and diagnose problems inside a pipe or pipeline system. This camera system is widely used in inspection of pipes, plumbing, sewer, centrail air conditioning, chimney, ventilation, cable pipe, building inspection and other places.

GENERAL SAFETY RULES:

Read all of the safety warning and instructions. Fauilure to follow warning and instructions may result in electric shock, fire or injury.

WARNING

1. Save this operation manual for future reference.
2. Do not operate this device in explosive atmospheres, such as in the presence of flammable liquids, gases, hazardous chemicals, superheated liquid or heavy dust. It may create sparks which may ignite the dust or fumes.
3. The camera head and the push cable are waterproof(when camera installed on rod cable), however, the battery pack, DVR and connecter cable are not. Do not expose them to water or rain when the control box is open. This will increase the risk of electrical shock.
4. Avoid using the device in environments of extreme cold, heat or humidity as it may damage the device.
5. Do not drop or press hard on the device.
6. Always backup your data before inserting your SD memory card to this system. The manufacturer is not responsible for any data loss or damage on your SD memory card for any reason.
7. Do not disconnect the unit while recording or playing back. It may damage the unit and/or the SD memory card.
8. Only qualified person are allowed to repair this device. Service or maintenance performed by unqualified person could result in injury.
9. Do not use this device in places where there is high voltage equipment. The device doesn't contain high voltage protection and isolation.
10. Do not use this device in places where there is high voltage equipment. The device doesn't contain high voltage protection and isolation.

APPLICATION / KNOW YOUR CAMERA

Application

Suitable for pipes at diameter of 25mm-200mm. Ability to go through 90° bends in pipe DN45mm.

Know Your Tool

The Deluxe Pipe Camera System includes four main parts.

- Camera head
- Cable Reel
- Battery pack
- DVR

The camera head includes high-light white LEDs and a highly scratch resistant sapphire lens cover; this coupled with a stainless steel housing allows the camera to withstand repeated hits in various pipes.

The flexible stainless steel spring and associated components allow the camera head to route through bends in pipes. The battery pack provides power for the system and the DVR monitor can record video and take photos in and out of the pipe without the need to hold the reel.

[DESCRIPTION SPECIFICATIONS AND STANDARD EQUIPMENT]
specifications

	Item	Parameter
General	Operating Temperature	-10~50°C/+14~+122°F
	Operating Humidity	30%RH~90%RH
	Storage Temperature	-20~60°C/+4~+140°F
	Power adapter	Input:110VAC~240V AC, Output:12V DC 1200mA
	MEAS.	53.5×23×47cm (LxWxH)
	Weight	10Kg(Approx)
Camera		Φ14mm camera head
	Sensor	1/4" CMOS
	TV-Line	400 TV-Line
	View Angle	90°
	Focus Distance	6-8cm (approx)
	Depth Of Field	20cm(approx)
	Camera Size	Φ14mm×21mm (Main body)
	Camera Length	125mm
	Front Lens	Sapphire
	Shell Material	304#Stainless Steel
	Lighting	Built-in 4×LED (White)
	Water-Proof	10m water (Camera fix on Cable)
	Power Supply	DC9~15V
	Current Consume	40mA (LED OFF), 60mA (LED ON)
DVR	Screen	7-inch 16:9 super bright high-definition color LCD screen
	Resolution	800×480 RGB
	Mirror and Flip	Support image mirror, Flip, Mirror & Flip
	Video Resolution	PAL 720×576 25FPS Max
	Video Encoding	H.264
	Photograph	720×480/720×576
	Audio Recording	Local Sound
	Out Put	TV and Audio output
	External Memory	Support SD Memory Card up to 32GB
	Data Output	USB2.0 To PC
	LED Driver	Built-in Dimmer
	Play Back	Video, Photo and Audio
	Language	English, German, French, Spanish, Italian, Chinese, Japanese, Russian, Portuguese
	Power Supply	DC 6~12V input
	Current Consume	700mA Max
Battery pack	Power Input	DC 9~12V input
	Battery Capacity	7.4V 6600mAh Li-ion Battery
	Power Output	6~12V DC ; 5V DC
	Life Time	7 hour (Record), 9 hour (Play Back)
	Charge Time	8 hour
Cable Wheel	Cable Diameter	Φ4.8mm
	Cable Length	100 Feet
	Meter Counter	Built-in
	Keyboard Text Writer	Optional
Tool Box	Size	517×434×200mm(L×W×H)
	Box color	Black

[INSTALLATION]

WARNING

To reduce the risk of serious injury during use, follow these procedures for proper assembly.

1. Install Camera Head

Put the cable into the hook of the handle, (Figure 7.) Hold the cable connector in one hand, then screw the camera and fix it on the cable tightly. (Figure 8.)

Figure 7. Cable reel in the case

Figure 8. Assembly/Disassembly Camera

2. Install aviation cable

Plug the cable into the socket of the panel and screw tightly. (Figure 9.)

Figure 9. Install aviation cable

3. Install power cable

Connect the power cable to battery and panel. (Figure 10.)

Figure 10. Install power cable

4. Install guide fitting

Support Guide are designed to help position the camera towards the middle of the pipe. There are 2 kinds of guides, choose guides properly per application requirement.

Install 80 Support Guides.

Mount the 80 support guide onto the stainless steel camera head. Then tighten the screw by screwdriver.

D80 Applicable to 4"-5" pipe.

Figure 12. Install 80 Support Guides

14mm camera head

Install 28 support guides.

Mount the 28 support guide onto the stainless steel camera head. Then tighten the screw by Wrench.

D28 Applicable to 1.5" -2" pipe.

Figure 13. Install 28 Support Guides

5. Install SD Card

(Figure 14.)

Figure 14. Instal SD Card

6. Turn on the battery pack and DVR.

[FUNCTION GUIDE]

1. Live video

Press [] to turn on/off DVR to enter the live video mode, then press [] to enter playback mode.

Press [] to start/stop recording.

Press [] to mirror or/and reverse the image.

Press [] adjust the brightness of camera LEDs.

Press [] to take a picture.

2. Video Option

Press [] to enter the video option menu. Press [] and [] to select items that you need, press [

] to confirm the selection. Press [] or [] to change the value. Press [] to save the setting.

Press [] to exit video option and save.

- Size D1 (720*576) / VGA (640*480) / QVGA (320*240)
- Video Seg: 10min/20min/30min/40min/OFF. Set 10-40min to restrict files length and open cycle-cover. Elder files will be covered by new files when SD card is full. Set OFF to close this function.
- Meter Counter: Reserve function.
- Sound: Turn on/off the local sound in Video Recording.
- Timestamp: Enable/Disable time stamp on screen.

3. Playback

Press [] the button to enter the playback, the user can browse, preview and playback media files.

Press [] and [] to browse and select media files.

Press [] to confirm the selection and preview media file. Press [] to preview the previous file. Press [

] to preview the next file. Press [] to playback video. Press [] to enter the play setting.

- Delete: Delete media files.
- Slide Show: 3sec/5sec/10sec. To set interval time of the slide shows.
- Protection: To protect important media files.
- Thumbnail: Browse 9 media files per page.
- File List: Browse 3 media files per page.
- LCD: LCD brightness.

4. Playing Movie

[] Pause/Play movie, [] Stop play movie, [] Rewind, [] Forward, you can press [] to set speed rate of rewind/forward.

5. SETUP

Press [] to enter the preferences of Record/Playback. Press [] enters Setup menu.

The following items are in the setup menu.

- Format: format SD card.
- LCD: LCD brightness.
- Language: English, German, French, Spanish, Italian, Chinese, Japanese, Russian, Portuguese.
- Sys. Reset: Reset all setting.
- Light frequency, 50Hz/60Hz, specifying your ambient light frequency.
- TV output: PAL/NTSC.
- Date input: To set date and time.

[PUSH CABLE AND CAMERA OPERATION]

At the job site

1. Always wear rubber gloves to operate the camera for health and safety reasons. Properly positioning the cable reel will save time and strength to push out and in the cable, and minimize the rate of equipment damage.

- When pushing, the end of your stroke should be as close to the entry as possible. Standing too far back with an excess of cable between your hands and the entry may cause the cable to fold on itself outside the entry and damage the cable.
- Try to keep the push cable away from sharp edge of a pipe entry because this may cause damage. If the camera does not seem to go any farther, **DO NOT FORCE TO PUSH THE CAMERA!** Try another entry if possible.

NOTE! Hands should be close to the line opening. DONOT catch the cable on the edge of an entry and continue to push.

2. Always try to run water down the pipe under going inspection. This will keep the system much cleaner, and allow you to push noticeably farther with less friction. If the water is preventing you from seeing an area of importance, temporarily turn it off.

3. When push the push cable through the pipeline by steady and slowly, a short distance entry per time, keeps the hands at the entrance, so that can control the push cable and prevent it stuck, bent or scratch.

4. When inspecting a pipe, most of the time a slow steady push through the system works the best. At changes in direction such as P-traps, Tee's, Y's, Elbows, etc. It is usually necessary to give a little extra push in the bends. Back the camera head approximately 8" (20cm) from the bend, if necessary, and give it a quick push, "popping" the camera through a turn, using the least amount of force required. Try to be as gentle as possible, and do not hammer or snap the camera head through corners. After some practice, you may learn that the best way to inspect a section of pipe is to push the camera through quickly. Then draw the camera back home slowly and evenly.

5. Make sure the sapphire window is clean prior to entry. Some users claim that a slight film of detergent on the lens minimizes the possibility of grease sticking to the port. If necessary, take advantage of any standing water in the pipe to wash the front of the camera by jiggling it in the water.

6. When you place the camera head into the pipe remember, as the materials of pipe vary, it will be necessary to adjust the lighting settings to maximize picture quality.

7. The system can travel through multiple 45 and 90 degree bends and wyes. Do not, however, try to force it through a P-trap or tee if there is a large amount of resistance.

NOTE! Do not try to use the camera head to clear obstructions. This System is a diagnostic tool, not a drain cleaner. Using the camera head to clear obstructions could damage the camera head or cause it to be caught in the obstruction.

8. Do not attempt to remove or stores push cable on the reel solely by turning the reel itse if. You can manually push or pull cable from the reel and wind or unwind it.

9. If the camera sits in a pipe, or an enclosed environment, heat will build-up. This may lead to the camera head overheating which will cause fuzzy lines to appear on the monitor. In the event, this happens, turn off the system, remove the camera from the pipe (or enclosed environment) and let the camera head cool for 10 to 15 minutes. Running water into the line will also help cool the camera head. Always use the minimum illumination required to maximize picture quality and to avoid excessive heat build-up.

Figure 10 Improper operation

NOTE! The camera head can get HOT! When finished with your inspection, or if taking a prolonged break in the middle of the inspection, turn off the system.

Retrieving the push cable

1. Once the inspection has been completed, pull the push cable back with slow, steady force. Do not force the push cable or exert excessive force. This could damage the camera or push cable. The push cable may get hung up while being retrieved, and may need to be manipulated as did during insertion.

2. Once the inspection has been completed, pull the push cable back with slow, steady force. Do not force the push cable or exert excessive force. This could damage the camera or push cable. The push cable may get hung up while being retrieved, and may need to be manipulated as did during insertion.

Note! NEVER USE SOLVENTS to clean any part of the system. Substances like acetone and other harsh chemicals can cause cracking of the camera ring, which could affect waterproofing.

3. Storing the push cable into the cable reel. One hand holds the push cable, the other hand close to the cable wheel. Slowly and gently push the push cable slide via the hook of the handle, cable reel will rotate and store the push cable inside.

Note! The hands should be close to the cable wheel when storing the push cable. Push the push cable a small piece every try. Push a long distance can cause the push cable bend or broken.

[BATTERY SAFETY AND USING GUIDE]

Using safety

Read the following battery precautions before charger, to reduce the risk of electrical shock.

1. Recharge batteries with accessory charging units.
2. Check the power units every time before using the equipment, be sure no problem, use of unauthorized parts may result in electrical shock, fire and/or serious personal injury or damage other instruments and system.
3. Never connects the car charger to any 24 volt cigarette lighter slot. It will harm the battery and DVR.
4. Do not short circuit, it may cause fire, electrical shock.
5. Do not charge the battery under rain or wet conditions. Water entering the charger will increase the risk of electrical shock.
6. If the charger and battery are damaged, do not use or stop to charge. It may cause electrical shock.
7. Don't disassemble the case, only qualified repair person can repair and maintenance.
8. Properly dispose of the battery. Exposure to high temperatures can cause the battery to explode. So do not dispose of in a fire. Some countries have regulations concerning battery disposal. Please follow all applicable regulations.
9. Do not touch anything which out from battery, which would burn or damage the skin, once touches please flush with water. If in eyes, immediately get medical help fast.

Using Guide

Follow the steps as below to reduce the injury of the electric shock.

1. Power indicator LED will be red during charging, will be turned to green when charged fully. If battery empty for a long term, it will pre-charge the battery automatically in 10 minutes, and LED will be blinking in red.
2. It needs about 8 hours to charge the battery fully. The battery can charge online, charging and supplying of work will not increase charging times.
3. User can use a power adaptor or car charger to charge the battery. If no use in a long term, take a recharge per 6 month, to ensure the battery in normal working status.

[OTHERS]

Troubleshooting

Problem	Probable fault location	Solution
Meter is not accurate	Knurled wheel slip	Fit glassfiber cable into the guide solt and hook.
	not set to zero	Press reset button to set zero.
No Battery level indicate	No power completely	To charge the battery
	Fuse burned	Change the fuse
No image	Cable connection faulty or loosely	Check cable connection, clean and reconnect if necessary
	Camera connector soiled	Clean the camera connector
	Wrong SD memory card	Turu off power and replace SD card
	Wrong setting	Enter the setup menu and select reset
Can not input Characters	The wireless keyboard low battery	Chang battery
	Wireless Keyboard or Receiver fault	Check the Keyboard Receiver and the keyboard on a PC
The deviation of MC more than 0.5%	select the wrong total length	Re-select the correct total length. You can press F2 key when the machine boot within 5 sec to enter background to select it.
	Pull out cable more than 3 meters before turning on the system.	Turn on the system before pulling out the push cable from the cable reel.

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation. Any changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the device.

CE

This product complies with standards including Low Voltage Device Directive 73/23/EEC;

EMC

Directive 89/336/EEC. It passed the subject tests by the authority concerned and is authorized to bear CE mark.

[WIRELESS KEYBOARD OPERATION] (Optional)

The keyboard text writer is used to type characters with the wireless keyboard and display on screen. The characters can be displayed in recorded video or captured photo. It supports max. 384 characters and quick one key hiding characters.

Text Input

1. Typing characters with wireless keyboard. Using arrow key to move cursor, backspace key to delete ,and enter key to change a new line.
2. Esc key to hide or appear all characters.Ctrl + Del to delete all characters.
3. You can type and edit characters while recording, the typing and editing will be recorded in the video files.
4. The typed characters will be stored in memory.

Note: You have to change the wireless keyboard Receiver together when changing a new keyboard.

Backstage Operation

You can press "F1" or "F2" key within 5 seconds after DVR monitor starts to enter F1 or F2 backstage operation.

1. The first line is reserved for user to type company name, name of operator, phone number etc., and these contents won't be hid by pushing ESC button. You can edit the contents by using F1 key, and press Enter key to save and exit.

2. Please refer to meter counter operation prior to this operation. Using F2 background key to select the unit of length or the total length of push cable (this is designed in case the total length of push cable is changed). When the "L=" flashes, press up or down arrow key to select the unit of length, or select the correct total length. Press enter key to save and exit.

Set Meter Counter

1. Press the meter-zero button to set the meter to zero on screen display.
2. Change the unit of length or the total length of push cable, please refer to 'F2 backstage operation' contents in the wireless keyboard operation.

Note1: The deviation of MC will increase if the total length is not correct. You need to select the correct total length to decrease the deviation. Use this function to change the displayed total length when the push cable is cut off for more than 3 meters.

Note 2: Turn on the system before pulling out the push cable from the cable reel. It can decrease the deviation of the MC.

[Meter Counter User manual] (Optional)

Specifications

Item	Parameter
Display length	Meter and Feet
Cable Length	20/30/40 meters (optional)
Accuracy	9cm/0,3Feet
Deviation	±0.7%
Counter Range	0~40 meters
Operating Temperature	-10~50°C/+14~+122°F
Operating Humidity	30%RH~90%RH
Storage Temperature	-20~60°C/+4~+140°F

Features

1. Meter Counter Set
2. Reset Button

Operation

1. Press the reset button to set the meter to zero on screen display.
2. Change the total length of push cable(this is designed in case the total length of push cable is changed). Press and hold the reset button then turn on the DVR. When the 'L=' flashes, press the reset button to select the correct total length. Press and hold the reset button 3 seconds to save and exit.

Figure 17. Meter Counter

Note1: The deviation of MC will increase if the total length is not correct. You need to select the correct total length to decrease the deviation. Use this function to change the displayed total length when the push cable is cut off for more than 3 meters.

Note 2: Turn on the system before pulling out the push cable from the cable reel. It can decrease the deviation of the MC.

[Text Writer User Manual] (Optional)

The Text Writer can type in characters to display on screen and record in video files. You can type and edit up to 40 characters.

Key Feature

1. Character key

- 26 English letters.
- 10 Arabic numerals.
- 13 symbols.

2. Function key

- Enter key, confirm typing.
- Del key, delete character.
- ← Key, move the cursor to left.
- Key, move the cursor to right.
- Shift key, switch English letters and Arabic numerals.
- Caps Lock key, switch capital letters and small letters.

Type Operation

1. Turn on the screen.
2. Make the Text Writer point to screen then press character keys.
3. Press the same key again to select letters circularly. No operation or press other keys in 2 Seconds to confirm current characters.
4. Press REC key on DVR to record the Video with characters.
5. You can type and edit characters while recording, the typing and editing will be recorded in the video also.

Figure 18. Text Writer

Notes: Reboot the DVR will lose all characters on screen. The characters on screen cannot be recorded on photos.

Type	Item	Parameter
Image	Sensor	1/4" CMOS
	TV-Line	400 TV-Line
	Pixel	648(H)x 488(V)
	View Angle	90°
	Focus Distance	6~8cm (approx)
	Depth-of-Field	20cm(approx)
	Front Lens	Sapphire
Transmitter	Frequency	512Hz
	Transmit Mode	Constant
	Transmission Distance	6 meters open area (max)
