The Pro Kit

The Pro Kit includes:

LT1000 Amplifier
Pool Scope
Pipe Mic
Dye Injector
Inspection Mirror
Flashlight
Headphones
Carrying Case

LeakTronics Pro Kit brings the most advanced and easy to use leak detection equipment in the swimming pool industry. The Pro Kit includes the Phantom Powered LT1000 Amplifier, the heart of all LeakTronics components. With the LT1000, all LeakTronics powered add-ons can be added to the kit at your convenience. The Pro Kit is used throughout the swimming pool industry on concrete, gunite, shotcrete, fiberglass, composite and vinyl liner pools. The Pro Kit comes ready to use with both the Pool Scope and Pipe Mic for listening and locating leaks at drains, lights, fittings, skimmers, side suction, structural cracks and more. New to Leak Detection? Start with a Pro Kit and add equipment as you need it.

Price: \$ 2,024 / \$ 2,174

The Pro Complete Kit

The Pro Complete includes:

LT1000 Amplifier
Pool Scope
Pipe Mic
Deck Plate
Multi Purpose Pipe Probe
Pressure Rig
Injection Plugs
Compression Plugs
Video Scope
Dye Injector
Inspection Mirror
Flashlight
Headphones
Carrying Case

LeakTronics Pro Complete Kit offers a complete leak detection kit that features the Phantom Powered LT1000 Amplifier, the heart of all LeakTronics kits. The Pro Complete Kit includes a multitude of add-ons including a pressure testing kit, a deck plate, the soil probe with extension and a micro camera with dye injector that allows the user to see in lines, light niches, deep skimmer throats and other hard to reach places. The Pro Complete Kit is used throughout the swimming pool industry on concrete, gunite, fiberglass, composite and vinyl liner applications. It includes everything you need to perform professional swimming pool leak detections.

All LeakTronics kits come with:

- A complete technical manual
- A 2 year limited or 5 year unlimited warranty
- Unlimited customer support

Price: \$ 3,190 / \$ 3,340

The F.L.A.S.H. Complete Kit

LeakTronics Patented F.L.A.S.H. (Frequency Location and Sound Hybrid) Leak Locating System identifies leaks from within lines and transmits a signal at the precise location of the leak. The F.L.A.S.H. unit can be used to locate leaks and pipe separations in swimming pools, plumbing, HVAC and gas lines, water mains, sewer and a multitude of other applications. It can be used in lines ranging from 1 to 60 inches in diameter. The LeakTronics F.L.A.S.H. can also be used for underground line location.

Price: \$ 3,223 / \$ 3,373

The F.L.A.S.H. Add-On

The F.L.A.S.H. add-on comes with all the functionality of the F.L.A.S.H. Complete without the LT1000 and Headphones you already have in your main kit.

Price: \$ 2,717 / \$ 2,867

The F.L.A.S.H. Complete includes:

LT1000 Amplifier
F.L.A.S.H. Mic
100 ft. Cable
Pipe Guides
1 1/2 inch Sleeve Adapters
1 1/2 threaded Plugs
2 inch Threaded Plugs
2 inch Sleeve Adapters
The F.L.A.S.H. Stick
Headphones
Durable Carrying Case
Water Resistant Carrying Bag

The Push Mic Complete Kit

The Push Mic Complete includes:

LT1000 Amplifier
Classic Over Ear Headphones
The Push Mic
The F.L.A.S.H. Stick
A Rugged Carrying Case
Unlimited Customer's Support

The Push Mic is a hydrophone that easily takes 90-degree turns in inch-and-a-half pipes and has F.L.A.S.H. technology for locating leaks fast.

Price: 2,145 / \$2,295

The Push Mic Add-On Kit

The same kit without the LT1000 Amplifier and headphones which are in your main kit.

Price: \$1,540 / \$1,690

The VILO Complete Kit

The VILO Complete Kit includes:

LT1000 Amplifier
VILO Transmitter
VILO Receiver
Pool Scope
Spot Mic
Wall Probe
Floor Probe
Float
Grounded Cables
Ground Rod
Headphones
Durable Carrying Case

The VILO Vinyl Liner Leak Location System pinpoints vinyl liner leaks by distributing a small square voltage charge throughout the pool. As this flow of electricity finds a ground point, the VILO probes will identify precisely where the leak is in the liner.

Price: \$ 2,695 / \$ 2,845

The VILO Add-On

The VILO Add-On comes with all the functionality of the VILO Complete without the LT1000 and Headphones you already have in your main kit.

Price: \$ 2,145 / \$ 2,295

The PG-2 Pulse Generator Complete Kit

The PG-2 Complete includes:

LT1000 Amplifier
Pipe Probe
The PG-2 Pulse Generator
Battery
Battery Charger
Connecting Cable
Durable Carrying Case

PVC and plastic pipes cannot be located in a conventional way because they don't carry an electrical current. LeakTronics Pulse Generator applies a gentle "pulse" that transmits a clearly audible sound throughout the pipe that is being located. When attached to a pressure line, the Pulse Generator's sound resonates through the line and any lines attached to it. With the LT1000 Amplifier and Pipe Probe, the user is able to listen to precisely identify the location of plumbing and pipes under soil, grass, landscape, concrete or asphalt.

Price: \$ 2,343 / \$ 2,493

The Pulse Add-On

The PG-2 stand alone is for contractors who currently have electronic listening equipment and would like to enhance their arsenal with superior line tracing capabilities.

Price: \$ 1,078

Hand-Held Video Pro Cameras

The Hand Held Video Pro (HHVP) standard and 1.5 Cameras are the best visual aids of the LeakTronics arsenal.

Offering high resolution sight in pipes ranging from 2 inches in diameter and up, the standard HHVP can be used on a straight run in 2 inch pipes (no guide) and can maneuver around 90 degree turns in 2.5 inch pipe elbows.

The HHVP 1.5 offers straight runs in 1 inch pipes and corners 90 degrees elbows in 1.5 inch pipes with ease.

With the included dye injector, the HHVP Complete Cameras locate blockages and leaks fast. Together with the CamVac, the HHVP Pro Cameras see leaks inside pipes like never before.

	Hand Held Video Pro	Hand Held Video Pro 1.5
Price	\$ 2,134	\$ 2,205
Navigates Elbow Diameter	2.5 inch	1.5 inch
Locator (Sonde)	Yes	Add-On \$440
Distance Meter	No	Yes
Dye Injection	Yes	Yes
Cable Length	65 ft.	65 ft.
Ability to Record	Yes	Yes
Compatible with CamVac	Yes	Yes
Hand Held	Yes	Yes
Carrying Case	Yes	Yes
Rechargeable	Yes	Yes
Adjustable LED's	Yes	Yes
Records Audio	Yes	Yes
2 Year Repair Warranty	Yes	Yes

The Plumber's Kit

The Plumber's Kit includes:

LT1000 Amplifier
Multi Purpose Pipe Probe
Magnetic Listening Disc
3 Inch Listening disc
Soft Sided Listening Disc
Large Deck Plate
Pressure Rig
Compression Plugs
Pressure Gauge
Injection Plugs
Headphones
Durable Carrying Case
Water Resistant Carrying Bag

When pipes leak, the pressure from the water rushing out at the point of the leak causes vibrations. The equipment in LeakTronics Plumber's Leak Detection Kit is designed to specifically identify the point of any leak in any situation whether under floors or behind walls and cabinetry, under concrete, raised foundations, under soil or ground cover - anywhere a leak manifests itself.

Determining whether the noise heard is the actual leak or background noise is made easier with the technology inside the Pipe Probe, Listening Disc and Deck Plate. All three components provide outstanding transference of sound which is relayed through the Phantom Powered LT1000 Amplifier.

Price: \$ 3,254 / \$ 3,395

The Irrigation Kit

The Irrigation Kit includes:

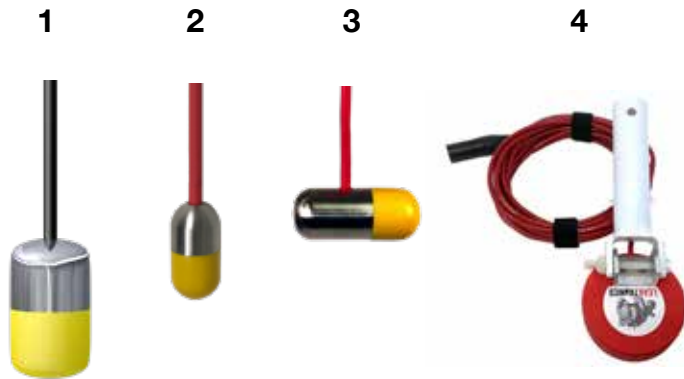

LT1000 Amplifier
Multi Purpose Pipe Probe
Pulse Generator (PG-2)
Headphones
Pressure Rig
1/2 inch, 3/4 inch and 1-inch compression plugs
1-inch injection plug
Pressure Gauge
Durable carrying case
Water Resistant Carrying Bag

The LeakTronics Irrigation Leak Detection Kit includes the equipment necessary to locate pipes and detect leaks throughout the Irrigation System. The PG-2 (Pulse Generator) included in the kit provides accurate line locating, including plastic and PVC as well as metal pipes, without the use of wires or electrodes. The tapping pulse carried through a line is easily detected upwards for 5 feet or more with the equipment in the Irrigation Kit.

The Soil Probe, in conjunction with the LT1000 Amplifier hears the sounds of leaks made using the Pressure Rig. Test for pressure loss on lines then find leaks fast with the equipment in the Irrigation Kit.

Price: \$3,190 / \$3,340

Our Mic Technology

LeakTronics Mics offer unmatched accuracy for precise leak detection in pools, spas, pipes and plumbing lines, water features and any water bearing vessel.

1. The Pool Scope
2. The Pipe Mic
3. The SM-1 Side Mic
4. The Spot Mic

Price: \$ 605 (each)

The Deck Plate

The Deck Plate™ with advanced noise filtering technology makes listening through concrete, brick, or any other solid surface simple.

Price: \$ 632.50 (small) / \$ 748 (large)

The Multi Purpose Pipe Probe

The Multi Purpose Pipe Probe is one of the most multifaceted tools in the leak detection industry. The Probe is the result of combining a Soil Probe and a magnetic contact mic into one versatile tool, allowing the user to check for leaks under soil and landscape areas. With the 3 inch interchangeable disc, getting into tighter spaces is possible.

Price: \$748

HydroDome

The HydroDome connects to any standard pool pole to isolate an area to listen for leaks. It is powered by the LT1000 Amplifier and its pivoting head allows it to be used on the floor as well as walls. The neoprene gas injected gasket allows the dome to sit flush on uneven surfaces. The HydroDome can be used to isolate and locate leaks in Vinyl, Plaster, Fiberglass and all pool material surfaces. The kit includes one electronic listening dome, one seal dome for main drains, side suctions, spa lights, etc., and a carrying case. It comes with a 2-year limited warranty and unlimited technical support.

Price: \$1,200

The electronic listening dome over a light.

The listening and seal domes over a spa dual drain system.

The CamVac System

A Revolution in Leak Detection

The CamVac is a non-invasive way to locate a leak in all types of plumbing. Using controlled vacuum, the CamVac System draws air from outside of the pipe, creating bubbles at the location of the leak. With the camera inserted in the line, the user is then able to see and locate the leak.

Price

CamVac System: \$ 759

With Standard Hand Held Video Pro: \$ 2,673

With Hand Held Video Pro 1.5: \$ 2,794

The CamVac Complete includes:

1 Controllable Vacuum Pump
1 CamVac Assembly (with pressure gauge, valve, drain canister)
1 Length of Connector Hose
2 - 1.5 inch Compression Plugs
2 - 2 inch Compression Plugs
1 Water Resistant Duffel Bag

F.L.A.S.H. Receiver

The F.L.A.S.H. (Frequency Location and Sound Hybrid) Receiver contains state of the art sensors which receive signals from the Hand Held Video Pro or from the F.L.A.S.H. Leak Location System. It can pick up the 512hz signal under concrete, dirt, rock, soil and water. The analog meter and external speaker allow users to know when they are at the location of the underground frequency.

Price: \$ 1,328.80

Small Video Inspection Camera

The small Hand Held Video Inspection Camera with dye injector is perfect for getting eyes on hard to reach places. The Camera head is small enough so that it fits inside swimming pool return lines, skimmer lines, spa jets and spa suctions as well as many hard to see places.

Price: \$ 324.50

The Swimming Pool Bundle with Online Training

The LeakTronics Swimming Pool Pro Bundle comes with the following equipment and now includes our Online Swimming Pool Leak Detection Training Course FREE - an \$ 1,800 added value!

Price: \$ 8,979

With VILO Add-On: \$10,326.50

The Bundle includes:

Online Leak Detection Training
Pro Complete Kit
F.L.A.S.H. Add-On
Hand Held Video Pro 1.5
F.L.A.S.H. Stick
Side Mic (SM1)
5 year warranty

Pressure Test Kit

The Pressure Test Kit is used to pressure test lines in swimming pools, plumbing and irrigation.

Price: \$ 324.50

The Pressure Test Kit includes:

Injection Rig with 1 Pressure Gauge
One (1) 1.5 inch Injection Plug
One (1) 2 inch Injection Plug
Four (4) 1.5 inch Compression Plugs
Four (4) 2 inch Compression Plugs

Red Line Professional Pressure Test Kits

Red Line Professional Pressure Test Kits include plugs for pressure testing lines.

UNIVERSAL PLUG KIT

Price: \$ 632.50

60 Pieces in kit

SERVICE PLUG KIT

Price: \$ 478.50

40 Pieces in kit

CLOSED PLUG KIT

Price: \$ 429

39 Pieces in kit

The Original And ONLY Controlled Post Tension Staple On The Market

The Torque Lock™ Staple is a revolutionary technique used to repair structural cracks on any solid cement based surface. Using its patented Cam Lock™ technique, it stabilizes the concrete crack by creating up to 5000 lbs. of compression torque for each staple installed.

TL10
Price: \$ 403.70

Complete Staple Kit includes:

- (5) 6-inch staples
- (5) 3-inch staples
- (1) Unit Epoxy
- Complete Installation Guide
- Torque Lock Marking Template

TL30
Price: \$ 1,156.10

Complete Staple Kit includes:

- (15) 6-inch staples
- (15) 3-inch staples
- (3) Units Epoxy
- Complete Installation Guide
- Torque Lock Marking Template

TL50
Price: \$ 1,908.50

Complete Staple Kit includes:

- (25) 6-inch staples
- (25) 3-inch staples
- (5) Units Epoxy
- Complete Installation Guide
- Torque Lock Marking Template

TLR-45
Price: \$ 427.90

Complete Staple Kit includes

- (5) 45° staples
- (15) Anchor Bolt Sets
- (5) Posts with Cams
- (1) Unit Epoxy
- Complete Installation Guide
- Torque Lock Marking Template

TLR-90
Price: \$ 427.90

Complete Staple Kit includes

- (5) 90° staples
- (15) Anchor Bolt Sets
- (5) Posts with Cams
- (1) Unit Epoxy
- Complete Installation Guide
- Torque Lock Marking Template

Online Leak Detection Training

Online Leak Detection Training Courses from LeakTronics offer the professional training that LeakTronics founder Darren Merlob is known for providing, with extensive details on the how-to's of Leak Detection, along with the educational facets of successfully transitioning your skills into a lifelong business. Online Training can be applied to employees at your company, or can be used to take the next step to stop outsourcing work and instead, get paid to provide professional leak detections in-house.

Your virtual training is all encompassing and remains available for you to reference after you've completed the course. You'll learn techniques and methods that go beyond how to accurately locate all leaks. You'll learn the psychology of dealing with customers, submitting the findings, best business practices to make you stand out in your field and of course, how to get paid for your work.

ONLINE POOL TRAINING: \$ 4,785

ONLINE PLUMBER'S TRAINING: \$ 5,005

ONLINE IRRIGATION TRAINING: \$ 4,015

- Equipment is included in the price of the online courses
- Practical "on the job" training instructed
- Unlimited technical support - we're here to back you up!
- Company listing on our Leak Professional Referrals Page
- Additional Add-On components for our kits are available
- LeakTronics customers enjoy early notification when new products are released

Swimming Pool Inspection Training and Certification

Swimming pool inspection must include proper leak detections. Without them, a pool isn't truly inspected and the results of an improper inspection can be costly! The need for proper pool inspection is continuing to grow with every property sold with a pool, every insurance claim made and every single pool installed. The opportunity to develop your own successful business, and to be the go-to professional in your community for complete swimming pool inspections and leak detections is here, now!

Until now, pool inspections have only been visual. We've changed that. We're upping the standards by which inspections operate and helping ensure that a pool meets all recommended guidelines before use, sale or property transfer.

Our extreme online training course covers how to inspect and verify the safety, functionality and operation of a customer's pool, spa and water features. You'll assure a customer that if any leaks exist, they will be identified and that their equipment is thoroughly inspected for issues that might need repair or replacement.

Course Price: 6,105

TRAINING BENEFITS INCLUDE:

- Knowing you have the industry's best training
- Gaining worksite efficiency and cost reductions
- Having the ability to serve additional client bases
- Creating real value in your community
- Building a repeat loyal customer base
- Guaranteeing a solid Return-On-Investment with expertise in your field
- Multi-point video inspection training

THE COURSE INCLUDES:

- Complete 300 point inspection checklist
- LeakTronics Pro Complete Leak Detection Kit
- Complete Leak Detection and Inspection Training
- Complete customer service and support
- Lifetime access to the online training modules
- Paperwork, Marketing aids and more

LEAKTRONICS

ELECTRONIC LEAK DETECTION EQUIPMENT

LeakTronics brand Leak Detection Equipment is manufactured in-house and completely innovates the traditional tools and methods of leak detection that have plagued the market for decades. LeakTronics equipment is manufactured to the technical aspects and durability required for working with modern day pool and plumbing equipment.

For discovering swimming pool and plumbing leaks wherever they happen - below slabs,

in cement, gunite, shotcrete, vinyl liners, in homes, pools, spas, fountains and any type of plumbing that carries water or fluid, LeakTronics equipment guarantees detection with precise and accurate results, every time.

Visit our websites to learn more about what we do and how you can take advantage of our online training courses and all the products we manufacture.
